P. J. Hilton, New York, USA
R. V. Kadison, Philadelphia, USA
D. G. Kendall, Cambridge, UK
F. Oort, Utrecht, Netherlands
P. Ribenboim, Kingston, Canada

This journal publishes articles in English, French or German in all branches of mathematics under the headings "Main Articles" and "Mathematical Notes":

Main Articles: These may be (I) expository essays, (II) surveys, (III) original research articles, (IV) historical studies concerning 19th and 20th century mathematics.

Mathematical Notes: These are shorter articles containing new results, new proofs of known theorems or novel points of view.

Other material like literature surveys, letters to the editor etc. will be published if and when suitable material becomes available.

Editorial policy

Our aim is to publish papers of interest to a wide mathematical audience, such as expository articles that make research results more widely accessible, and papers on topics with fairly broad appeal. Main articles must be written in such a way that a research student interested in the topic of the paper can read them profitably. Mathematical notes can be at a slightly higher level. Clarity of exposition, accuracy of details and the relevance and interest of the subject matter will be the decisive factors in our acceptance of an article for publication. All papers are refereed.

Submission of manuscripts

Authors should either mail three hard copies of the manuscript, or send by electronic mail a .ps or .pdf version, to the Managing Editor. Once the article is accepted, the author must provide the article as LaTeX file, if available.

Articles written in a language other than English should be accompanied by a short abstract in English. For further details concerning the preparation of manuscripts consult "Instructions to authors".

Instructions to authors see the journal's home page <http://www.elsevier.de/exmath>

Offprints

Fifty (50) offprints of each paper are supplied free of charge. Issues or additional offprints will be provided against payment.

There is no charge for published pages. Corrected proofs will be available online (www.sciencedirect.com) before the publication of the print edition.
